

EDGEWORK AND PROCESSING
EDGEWORK GUIDELINES

CLEAN CUT

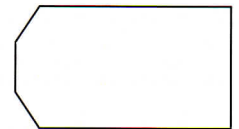

Edges are cut, unprocessed, no edgework. Extremely sharp.

SEAMED/SWIPED

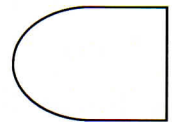

This edge receives one pass top and bottom to remove sharpness. Edge is not completely ground.

FLAT POLISH

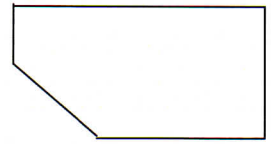

Standard edge suitable for furniture and frameless panels. High polished aris edge.

PENCIL POLISH

This edge suitable for furniture. High polished round edge.

BEVELED EDGE

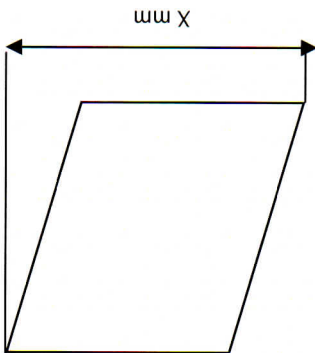

This edge is decorative and is suitable for furniture. High polished aris edge.

MITRED EDGE

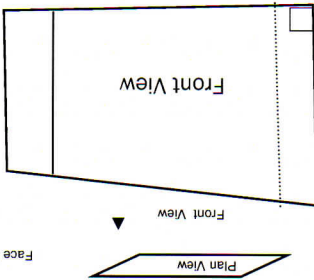

Edges are flat polished then mitred. This edge is used for glass silicone butt joints.

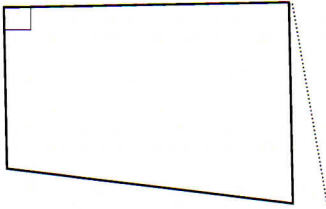

Ordering Mitred Glass

Back Mitre
Face Mitre

Always give long point measurement

For out of square panels, send drawing
